(54) CARBONIZING FURNACE AND METHOD OF CARBONIZATION

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a method of carbonization intended to further streamline a carbonizing treatment using a carbonizing furnace.

SOLUTION: The carbonizing furnace has such a scheme that inner ovens 100 are disposed at intervals inside an outer oven 200, these interval spaces being served as combustion chambers, each of the inner ovens 100 is so designed as to close one end thereof and provide the other end with an inner oven lid 107, whereas the outer oven 200 is so designed as to open one end 202 thereof and close the other end 204 and be movable in the longitudinal direction relative to the inner ovens 100, and the outer oven 200 is moved to introduce the inner ovens 100 via the opened end 202 into the outer oven 200, thereby constructing the objective carbonizing furnace.
